

CWRX706/707

DESIGNED
TO PROTECT

Laboratory Coat

28GSM SPP

Features

- ▲ 28gsm lightweight Spunbonded Polypropylene (SPP) non-woven material
- ▲ Protection from non hazardous dry particle and water based liquid sprays and splashes
- ▲ Elasticated wrists
- ▲ Velcro front closure
- ▲ Single collar design
- ▲ Suitable for food and medical use

Specifications

Part No. CWRX706
CWRX707

Material SPP

Sizing

Available Sizes
XL, 3XL

Packaging

50

Available Colours

CWRX706 White

CWRX707 Blue

Material Guide

SPP

Spunbond Meltblown Spunbond (SMS) is a unique trilaminate construction, that offers good tensile strength and barrier protection. Usually more breathable than Microporous and often selected to keep wearers cooler whilst working in high heat areas. The softer feel of SMS makes it a comfortable choice. SMS can be anti-static, fire retardant treated, or liquid proofed that allows for a variable range of applications.
